SUMMARY

Pipeline-devouring software engineer with 3 years' experience, eager to apply my programming skills and robust knowledge of Java, Python, and C#. Successfully launched three company-wide software systems that increased productivity by 28%.

EXPERIENCE

Junior Software Developer

Google Inc

2018 - 2019 Mountain View, CA

Worked on developing and implementing order management systems

- Led a team of four in the successful completion of a client-server trading application, resulting in a 40% increase in trading efficiency.
- Improved transaction processing speed by 25% by optimizing SQL queries and using caching techniques.
- Mentored two new hires on the team, improving overall team productivity by 30%.

Software Developer Intern

Microsoft Corporation

2017 - 2018 Redmond, WA

Involved in developing new features for the Azure platform

- Developed 3 new features for Azure, resulting in a 20% increase in user engagement.
- Fixed 45 critical bugs significantly improving overall system stability.
- Received Employee of the Month award for meeting project deadlines ahead of schedule.

Freelance Software Developer

Self-Employed

2016 - 2017 Remote

Worked with several clients to develop custom software solutions and web applications.

- Programmed a custom software solution that reduced data processing time for a major client by 60%.
- Developed a web application that attracted 50,000 users within the first month.
- Collaborated with a client to create a unique dashboard interface improving data visualization for users.

EDUCATION

MSc in Computer Science

Stanford University

2014 - 2016 Stanford, CA

BSc in Computer Science

University of California, Berkeley

2010 - 2014 Berkeley, CA

SKILLS

Java, Python, C#, Spring Boot, Hibernate, SQL, Scrum, JUnit, Machine Learning

CERTIFICATION

Python for Data Science

Online course offered by IBM on Coursera.

Machine Learning A-Z™: Hands-On Python & R in Data Science

Comprehensive course provided by Udemy covering Machine Learning theories and applications.

PASSIONS

Code Challenges

I love taking part in coding challenges; they help me improve my skills, and I relish the competitiveness.

Music

I enjoy playing the piano as it provides me with a creative outlet and a method of relaxation.

STRENGTHS

Excellent Problem-Solving Skills

Proven ability to solve complex problems under pressure; once debugged and resolved a major software issue during a crucial product launch.

Strong Interpersonal Skills

Collaborated with diverse teams, facilitating clear communication between developers and stakeholders that enhanced overall project efficiency by 30%.

Adaptive Learner

Quick adaptability to new technologies, evidenced by proficiency in different programming languages and ability to learn new languages within short time-frames.
