

Dana Whitfield

Backend Software Engineer | dana.whitfield@example.com | +1 (555) 019-2244

Summary

Backend engineer with 5 years building and operating production APIs and data pipelines. Comfortable owning a service from design

Experience

2022 - Present: Software Engineer, Northwind Analytics

Built and maintained internal REST APIs serving product and billing data.

Migrated a batch ETL job to an event-driven pipeline, cutting latency from hours to minutes.

Owned the on-call rotation for the payments service for two years.

2020 - 2022: Software Engineer, Bluecrest Systems

Developed a customer-facing dashboard and its supporting API layer.

Wrote integration tests that cut production regressions by roughly a third.

Skills

Python, SQL, PostgreSQL, Docker, AWS, Git, JavaScript, TypeScript, Django, FastAPI, Linux, REST API design

Education

B.S. Computer Science, Riverton State University, 2020
