

Priya Natarajan

Senior Backend Engineer | priya.natarajan@example.com | +1 (555) 481-2093

Summary

Backend engineer with 5+ years designing and operating Python services at scale.

Experience

2021 - Present: Senior Software Engineer, Fairbank Systems

Built and scaled a Python/FastAPI billing service handling 40k requests/min in AWS.

Designed the PostgreSQL schema and query layer (SQL) for the reporting subsystem.

Containerized all services with Docker and led the migration to Kubernetes.

Owned the on-call rotation and cut incident response time by half.

2019 - 2021: Software Engineer, Larkspur Data

Wrote Python ETL pipelines against SQL data warehouses for the analytics team.

Deployed services to AWS using Docker images and infrastructure-as-code.

Skills

Python, SQL, Docker, AWS, Kubernetes, PostgreSQL, FastAPI, Git

Education

B.S. Computer Science, Fairview Institute of Technology, 2019
